

Problem #1 FizzBuzz...

Create a console app that accepts an array of integers as input.

For any given natural number greater than zero print the following:

- “Fizz” if the number is divisible by 3
- “Buzz” if the number is divisible by 5
- “FizzBuzz” if the number is divisible by both 3 and 5
- The number itself if it is not divisible by both 3 or 5

Examples

Input	Output
1	1
2	2
3	Fizz
4	4
5	Buzz
6	Fizz
15	FizzBuzz
